

9 Ways to Make Your Nonprofit Website Accessible

TEXT

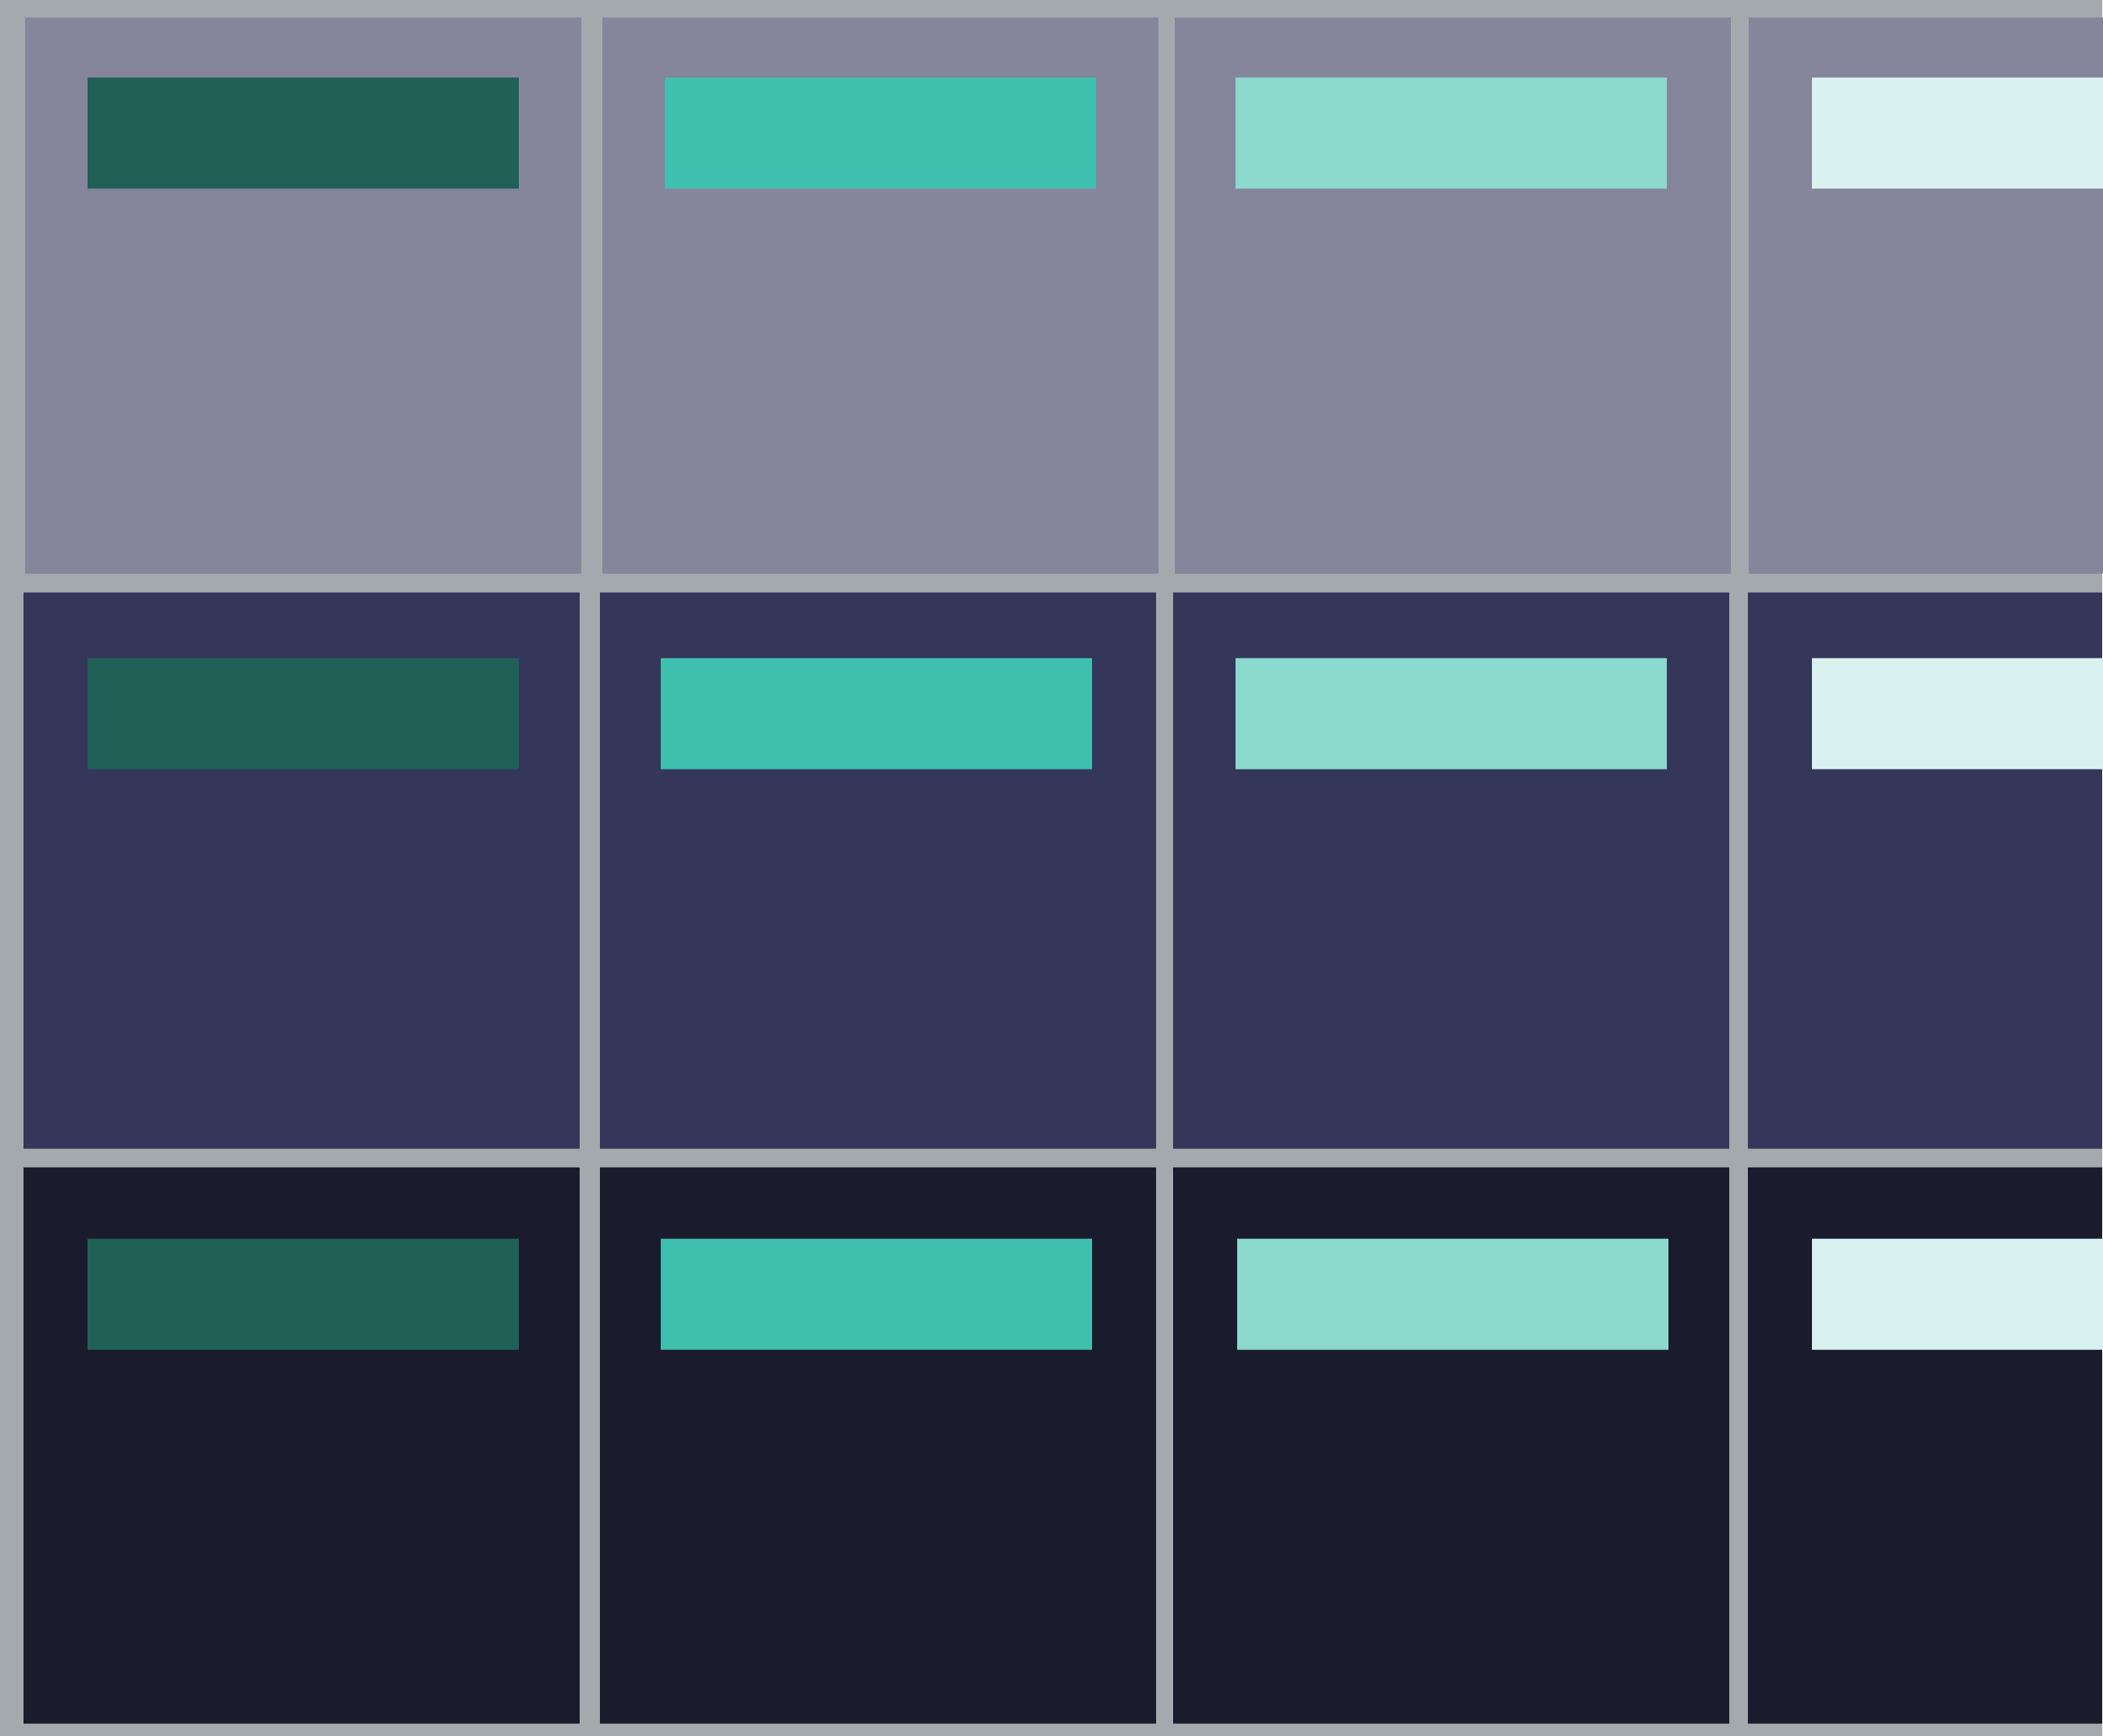

1. Make text size at least 16 pt
2. Include alt text for all non-text content
3. Add closed captions to videos
4. Make all links text descriptive

COLOR

5. Check your color contrast ratios
 - Small text and images 4.5:1*
 - Large text (18pt+) 3:1

6. Ensure that the **color** of the text is not the only indication of meaning

*foreground: background color (see WCAG 2.0)

NAVIGATION

7. Add concise text for error messages

8. Allow full website navigation via keyboard actions

9. Allow flexible time limits for content visibility
